3 INDUSTRY AND COMPANY OVERVIEW

3.1 Overview of the dairy industry

The dairy industry continues to be one of Australia's major rural industries. Australian dairy has an estimated farm gate value of production of \$4.8 billion. Australian dairy ranks fourth in terms of world dairy trade with a 5% market share.

Approximately 5,055 dairy farmers produce around 8.8 billion litres of milk. The Australian dairy industry directly employs approximately 45,000 Australians on farms and in factories.

Dairy is also one of Australia's leading rural industries in terms of adding value through downstream processing. Much of this processing occurs close to farming areas, thereby generating economic activity in country regions.

Dairying is a well-established industry across temperate and some subtropical areas of Australia. While the bulk of milk production occurs in the southern states of Australia, all states have dairy industries that supply fresh drinking milk to nearby cities and towns. A range of high-quality consumer products, including fresh milks, custards, yogurts and a wide variety of cheese types, are produced in a number of Australian States.

Dairying continues to be an important rural industry of Australia. On-farm productivity continues to increase through improved pasture, feed and herd management techniques.

While supplementary feeding with grains is relatively common, the Australian dairy industry is still predominantly pasture-based. All States have viable milk productions, supplying fresh milk to nearby cities and towns. As a major regional employer, the dairy industry value-adds through the processing of milk to produce fresh lines such as butter, cream, cheese and yogurt.

The Australian dairy industry is deregulated, with open and international markets and together with commodity prices are major factors in determining the milk price received by farmers.

3.2 Overview of Company

The Company is an independent organisation, owned and run by Australian dairy farmers. Our farmers supply quality milk from their dairy farms to our partner companies. Those companies then make premium dairy products that are sold in Australia and overseas.

The organisation was established in 2012 with a firm vision: to look after its dairy farmers and make sure they receive a fair price for their milk. The Company works with its farmers to give them every opportunity to be profitable so they can grow their dairy businesses with confidence. To achieve this, the Company partners with companies that understand the needs of its farmers.

The Company converted from a co-operative structure to a public company limited by shares on 5 February 2016.

During FY 2018, ADFC Nominees Pty Ltd ACN 622 102 854 (**Share Trustee**), a subsidiary of the Company, was incorporated. The sole purpose of the Share Trustee is to act as trustee of a trust established to hold Ordinary Shares of departing Suppliers on trust for the remaining Shareholders. These Shares previously converted into a Dry Class Share, which had no voting rights attached. For administrative ease, the Company changed its capital structure to remove Dry Class Shares from the date of the lodgement with ASIC of the 2018 Prospectus (18th December 2018). All Dry Class Shares on issue at that date have been converted into Ordinary Shares. Under the Constitution, the Share Trustee must abstain from voting in respect of any Shares that it holds.

The Company currently supplies approximately 287 million litres of milk to its six key customers per annum. Our farmers are at the core of all we do. We operate with honesty, transparency and fairness. We believe the key to a thriving Australian dairy industry lies with farmers running profitable businesses so they can invest back into their farms. With security assured, farmers can produce quality milk, adhere to best practice in animal welfare, care for the environment and become employers of choice.

The Company works with its Shareholders and customers to deliver a mutually beneficial policy framework to cover the supply of milk. A copy of the current policy is available on the Company's website (<https://adfc.com.au/milk-supply/>).

3.2.1 Some of the benefits for farmers who supply milk to the Company

- (b) No stop/volume/logistic charge
- (c) Premium up-front price for milk
- (d) A transparent and low overhead cost model where the focus is on returning more to the farm gate price

3.2.2 Some of the benefits for companies who partner with the Company for supply of milk

- (a) Support Australian farmers
- (b) Access to quality milk
- (c) A true partnership working closely together to understand each other's business
- (d) A unique and transparent cost-plus model for milk pricing

3.3 Company Strategy

The Company fully understands that to be able to protect the interests of its Shareholders going forward it needs to be involved in the dairy industry more and work closely with its customers. The Company expects to continue to supply its six major customers and bring on new customers from time to time.

Key to the Company's strategy is its values which are defined by the four **C's**: collaborative, co-operative, choice and cost-effective. All the Company's actions, decisions and investments are guided by these core values.

Collaborative

The Company works with its farmers and partners – it will not compete with its customers. Instead it will co-invest to maximise the efficiency of the supply chain. Its focus is on profitability and fairness for its farmers and for its customers.

Co-operative

The Company is based on co-operative principles. Its farmers are shareholders and thus have a stake in the business: they share in the business risks, but they also share in the successes. The Company concentrates on maximising returns for its farmers for both the short and long term.

Choice

The Company's unique milk pricing structure allows its farmers to choose the milk production pattern that is best suited for their farm and their family.

Cost-effective

The Company supports a farmer-focused, low-cost model, which it believes is best suited to the dairy industry in Australia.

Under the Deed, the Company must maintain a policy of insurance provided and maintained by the Company insuring the Directors against liability as a Director of the Company until the end of the Access Period.

5 RISK FACTORS

An investment in the Company is a speculative investment because of the nature of its business with no guarantee of success. An investment in the Company may not be suitable for all recipients of this Prospectus.

As the majority of Shares to be issued are redeemable for their initial subscription amount (i.e., \$1.00), an investment in the Company should not be regarded as an investment that will achieve capital growth. Rather the investment will assist the Company's operations and strategy with Shareholders ultimately receiving benefit from the greatest possible milk price the Company can obtain from its end customers.

Investors should recognise that there are a number of general and specific risks that the Company faces, which may materially and adversely impact on the future operating and financial performance of the Company and the value of the Shares. As many of these risks are outside the control of the Company and/or its Directors, there can be no guarantee that the Company can achieve its objectives.

Prospective investors should read this Prospectus in its entirety and carefully consider the risk factors impacting on the Company as well as their own investment objectives and their financial position prior to making their investment decision in respect of whether or not to subscribe for Shares. If prospective investors are uncertain of matters detailed in this Prospectus and/or their financial circumstances in respect of investing in the Company, they should take appropriate advice from their stockbrokers, solicitors, accountants or other professional advisers as appropriate.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

5.1 Company Specific Risks

Reduction in milk supply

The majority of milk supply arrangements with the Suppliers are subject to contracts that can be terminated by the Supplier from 1 July 2021 giving the company a 30-day notice period. The company also has the right to terminate the supplier contracts, giving a 30-day notice period. Therefore, many Suppliers can choose to cease supplying to the Company at any time, subject to the notice period, including because of changes in the milk price (see below). This could lead to a reduction in the amount of milk available for processing by the Company's customers.

If there was a significant reduction in milk supply available for processing for any reason, including because of Suppliers choosing to cease supplying to the Company, adverse weather conditions, a reduction in the number of dairy farmers or increased competition, then this would adversely impact on the Company's revenue, profitability and growth.

Changes in milk prices

The Company's major expenditure each year is the payment made to Suppliers for milk. Milk prices are affected by supply and demand factors, domestically and internationally. Further, aggressive behaviour by competitors may cause an increase in milk prices, including to a level that the Company is unable to match which could cause a reduction in milk supply to the Company (see above). A decrease in commodity prices, whether as a result of the actions of competitors or more general economic or supply and demand factors in Australia or internationally, may result in the Company having to reduce its opening milk price with a consequent potential for a reduction in milk supply (see above).

Behaviour of customers	<p>A significant change in demand for, or the prices paid for, the Company's product from the Company's key customers, including because of a change in demand from the end purchasers of the Company's products or because of the actions of competitors, may affect the Company's sales and have a material and adverse effect on the Company's revenue, profitability and growth. Today the Company has six customers. The Company has formal supply contracts with current customers until 30 June 2021. Pricing for the FY21 financial year has been agreed with all customers. The Company has been supplying all customers since 1 July 2020 on the basis of those terms. Any failure to finalise this contract may affect the Company's sales and have a material and adverse effect on the Company's revenue, profitability and growth.</p>
Increased competition	<p>The Company is subject to competition for the supply of milk. While the Company continues to have a reasonable expectation of the continued growth in markets and demand for its product, the Company remains cognisant of considerable existing competition and the potential for increased competition from existing and new competitors. This may reduce the volume and/or price of product that the Company is able to sell which may have a material and adverse effect on the Company's revenue and profitability and, in particular, its growth.</p>
Product risk	<p>Milk is a very perishable product and any inefficiency in its handling and processing can critically affect the quality of the end product and thus the price for which it can be sold. Further, there is a risk of product contamination by a range of agents or pathogens such as salmonella, e coli and listeria at all stages of the milk collection and production process.</p> <p>An incident of product contamination or the perception that such an incident has occurred may result in considerable reputational damage to the Company from the perspective of its Suppliers, customers, the general public and regulators, as well as materially and adversely affecting the Company's revenue, profitability and growth, including through the loss of contracts for the supply of products, and may also result in significant compensation payments and the payment of significant penalties.</p>
Litigation or claims	<p>The Company may be subject to litigation and other claims or disputes in the course of its business, including employment disputes, contractual disputes, indemnity claims and product liability claims. Claims may also be made by government agencies or regulators. Such litigation, claims and disputes, including the costs of settling claims, may materially and adversely affect the Company's operational and financial performance and reputation. Further details are set out in section 9.11.</p>
Dividends	<p>There is no automatic or fixed dividend rate entitlement for Shares, and the Board is not obliged to declare dividends in any financial year.</p> <p>The funds which will be available for payment of dividends are subject always to available proceeds, which are determined after maximising milk payments to Suppliers, meeting all operating costs and expenses and retaining sufficient funds necessary for ongoing working capital. Each year the Board will determine if any dividends are payable on Shares and, if so, how much.</p>

Non-marketability of Ordinary Shares As the Company is not listed on any stock exchange, there is not a ready market for any Shares which Shareholders may wish to sell.

The Board has the right to refuse registration of any transfer of Ordinary Shares. The Board will exercise this discretion where the Constitution will be breached if the transfer occurred, or where its co-operative principles or co-operative status for income tax purpose are put at risk. Ordinary Shares (which are required to be held by Suppliers) may not be transferred to non-Suppliers.

Transfer and Redemption of Shares If an Ordinary Shareholder ceases to be a Supplier, the Board has the right to transfer all of that Ordinary Shareholder's Ordinary Shares to the Share Trustee for consideration of the issue price of those shares. In addition, upon a person ceasing to be a Supplier, that person's Redeemable Preference Shares will be redeemed by the Company for the amount paid up on those shares. Further details are set out in section 9.2.9.

5.2 Industry specific risks

Disease Australia is recognised internationally as being free of cattle diseases such as bovine tuberculosis, brucellosis and bovine spongiform encephalopathy. Further, Australia is officially recognised as free from both foot and mouth disease and 'mad cow disease'. Should an outbreak of any of these diseases occur in Australia, then the Company's business may be adversely affected due to dairy herd quarantine restrictions and depleted dairy herd numbers, with a consequential reduction in available milk supply. Some dairy products manufactured from infected herds also may be subject to recall. The impact of such a disease outbreak may materially and adversely affect the Company's revenue, profitability and growth.

Climatic conditions The quantity and quality of the Company's products may be adversely affected by climatic conditions. Any adverse change to climatic conditions in the short or long term may impact on the sustainability of Australia's milk supply. This may have a material adverse effect on the Company's revenue and profitability.

Systems and infrastructure The Company is dependent on the ongoing, efficient operations of its systems and infrastructure. Risks that may threaten the Company's operations include natural disasters, failure of critical machinery, power, gas, water supply and computer equipment and industrial action.

5.3 General risks

Government regulations The Company is subject to the laws of the relevant jurisdiction in which it operates. Those laws may:

- be made or changed at any time; and
- materially affect the commercial feasibility and later profitability of the project.

The application of the laws can result in:

- increased costs; and/ or
- forfeiture of property in circumstances that may not give rise to rights for compensation.

Taxes	<p>The Company is subject to relevant government financial imposts. The nature and amount of the imposts are determined by government. They may be:</p> <ul style="list-style-type: none"> • imposed or changed at any time; or • materially affect the commercial feasibility and later profitability of the project.
Limited operating history	<p>The Company has operated as a co-operative since 2012 and has been incorporated since 5 February 2016. It has had a limited operating history. The prospects of the Company must be considered in light of the risks, expenses and difficulties frequently encountered by companies in their early stage of development which have a high level of inherent uncertainty.</p> <p>The Company's ability to achieve its objectives depends in part on the ability of its Directors and officers to implement current plans and respond to any unforeseen circumstances that require changes to those plans.</p>
Economic	<p>The performance of the Company is affected by general economic and business conditions. A downturn in either of the national or global economies may result in a decrease in customer demand.</p>
Reliance on Key Personnel	<p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these key personnel cease their involvement with the Company.</p>

Notes to the Financial Statements

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of the financial report are set out below. These policies have been consistently applied to all years presented, unless otherwise stated. The financial report is for Australian Dairy Farmers Corporation Ltd (formerly Australian Dairy Farmers Co-operative Limited) ('ADFC' or the 'Company'), an unlisted public company incorporated and domiciled in Australia and is the group's ultimate parent.

(a) General information and basis of preparation

The condensed interim consolidated financial statements (the interim financial statements) of the Group are for the six months ended 31 December 2020. These general purpose interim financial statements have been prepared in accordance with the requirements of the Corporations Act 2001 and AASB 134 Interim Financial Reporting. They do not include all of the information required in annual financial statements in accordance with Australian Accounting Standards, and should be read in conjunction with the consolidated financial statements of the Group for the year ended 30 June 2020.

The interim financial statements have been prepared in accordance with the same accounting policies adopted in the Group's last annual financial statements for the year ended 30 June 2020, unless otherwise stated. Accordingly, the accounting policies included in the Group's last annual financial statements for the year ended 30 June 2020 are the relevant policies for the purposes of comparatives.

The consolidated financial statements for the period ended 31 December 2020 were approved and authorised for issue by the Board of Directors on 25 February 2021.

These consolidated financial statements have been prepared on an accrual basis and are based on historical cost modified where applicable by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

(b) Going concern basis of accounting

As outlined in Note 19 to the interim consolidated financial statements, the Group expects to continue operating as an ongoing entity and will enter into new supply agreements with existing and new customers as and when appropriate.

At the date of the interim consolidated financial statements, agreement of pricing for the FY 21 financial year has been reached with all customers and formal contracts are being negotiated.

The financial statements of the Group do not include any adjustments relating to the recoverability or classification of recorded asset amounts or classification of liabilities, which might be necessary should the Group not be able to continue as a going concern.

(c) Significant management judgements

When preparing the financial statements, management undertakes a number of judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses.

The following are significant management judgements in applying the accounting policies of the Group that have the most significant effect on the financial statements.

Recognition of deferred tax assets / liabilities

The extent to which deferred tax assets can be recognised is based on an assessment of the probability of the Group's future taxable income against which the deferred tax assets can be utilised.

Useful lives of depreciable assets

Management reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected utility of the assets.

Coronavirus (COVID-19) pandemic

Judgement has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the group based on known information. This consideration extends to the nature of the products offered, customers, supply chain, staffing and geographic regions in which the group operates. Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements, or any significant uncertainties with respect to events or conditions which may impact the group unfavourably as at the reporting date or subsequently as a result of the Coronavirus (COVID-19).

The Historical Interim Consolidated Financial Information is presented in an abbreviated form insofar as it does not include all of the presentation and disclosures required and other mandatory professional reporting requirements applicable to general purpose financial reports prepared in Australia in accordance with the Corporations Act 2001.

This report has been prepared for inclusion in the Prospectus. Our Responsibility

Our responsibility is to express a limited assurance conclusion on the Historical Interim Consolidated Financial Information based on the procedures performed and evidence we have obtained. We have conducted our engagement in accordance with the Standard on Assurance Engagements ASAE 3450: “*Assurance Engagements involving Corporate Fundraisings and/ or Prospective Historical Financial Information*”. Our procedures consisted of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and review procedures applied to the accounting records in support of the Historical Interim Consolidated Financial Information.

These procedures are substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain reasonable assurance that we would become aware of all significant matters that might be identified in an audit. We have not performed an audit and, accordingly, we do not express an audit opinion on the Historical Interim Consolidated Financial Information.

Our engagement did not involve updating or reissuing any previously issued audit or review reports on any Historical Interim Consolidated Financial Information used as a source of the Historical Interim Consolidated Financial Information.

Conclusion

Historical Financial Information

Based on our independent review, which is not an audit, nothing has come to our attention which causes us to believe that the Historical Interim Consolidated Financial Information of ADFC as described in the "Financial Information" section of the Prospectus does not present fairly:

- The historical interim consolidated statement of profit or loss and other comprehensive income for the half-year ended 31 December 2020 of ADFC;
- The historical interim consolidated statement of cash flows for the half-year ended 31 December 2020 of ADFC; and
- The historical interim consolidated statement of financial position as at 31 December 2020 of ADFC;

in accordance with the measurement and recognition requirements (but not all of the presentation and disclosure requirements) of applicable Accounting Standards and other mandatory professional reporting requirements under the AIFRS.

Accumulated milk deductions from milk payments will be used to pay for Redeemable Preference Shares in June each year.

The minimum deduction will be \$0.0675 per kilogram of milk solids and the maximum will be \$0.2025 per kilogram of milk solids, subject to the discretion of the Board. Consultation with Shareholders will take place each year before the amount of the deduction is set.

As a guide, based on total kilograms of milk solids received and on-sold by the Company in FY 2020, being approximately 26.5 million kilograms, the minimum number of Redeemable Preference Shares that may be issued under the Equity Share Scheme would be approximately 1,787,631 to a maximum of approximately 5,362,892. It is noted that this is a guide only and the actual number of Redeemable Preference Shares that may be issued under the Equity Share Scheme is subject to change.

8.3 Purpose of the Offers and Use of Funds

The proceeds of the Offers will be used for working capital.

8.4 Capital Structure

The capital structure of the Company at the date of this Prospectus is set out below:

Figure 3: Company’s Capital Structure

	Ordinary Shares held by Suppliers	Ordinary Shares held in Share Trust*	Redeemable Preference Shares
Shares on issue	141	31	705,000

* These were formerly Dry Class Shares in the Company held by former Suppliers. On the lodgement of the 2018 Prospectus, the Constitution was amended to remove Dry Class Shares from existence and all Dry Class Shares were converted to Ordinary Shares. Each of these former Dry Class Shares was transferred into the Share Trust. The Share Trustee has and will continue to transfer those Shares to new Suppliers from time to time. Under the terms of the Constitution, the Share Trustee will abstain from voting in respect of Shares that it holds.

8.5 How to apply

Eligible Suppliers and existing Shareholders can participate in the Offers.

If the Company invites you to apply for Shares under the Offers, the Company will provide you with a copy of this Prospectus, an Application Form and a Transfer Form. If you choose to participate in the relevant Offer, you must complete and return the Application Form and Transfer Form to the Company. Your Application Form must either:

- (a) be accompanied by a cheque for the full amount of your Application Monies; or
- (b) be marked to authorise the Company to off-set the Application Monies against amounts the Company is due to pay you for the supply of milk products.

Cheques are to be drawn in Australian dollars and made payable to “Australian Dairy Farmers Corporation Limited” and crossed “Not Negotiable”. Payments by cheque will be deemed to have been made when the cheque is honoured by the bank on which it is drawn.

If you select to off-set the Application Monies against amounts due for milk supply, the Company will deduct such amount as an immediate lump sum or deduct it over a period of time and provide you with confirmation that this has occurred at the time your Shares are issued.

If an Application Form is not completed correctly, or if the accompanying payment is for the wrong amount, the Company may still accept the Application. The Company's decision as to whether to accept the Application or how to construe, amend or complete it shall be final, but no Applicant will be treated as having offered to purchase more Shares than indicated by the amount of the cheque for the Application Monies.

Eligible Suppliers applying for Shares will also be required to apply for Redeemable Preference Shares that may be issued by the Company under the Equity Share Scheme during the period of the Prospectus. Please refer to section 8.2 for further information on the Equity Share Scheme and the number of Redeemable Preference Shares that may be issued to Shareholders for the supply of milk products, in lieu of payment. As noted, the Board will consult with Shareholders before such deduction is determined under the Equity Share Scheme. The Company will notify all Shareholders of such deduction at the time as issuing further share certificates for Redeemable Preference Shares that may be issued under the Equity Share Scheme.

Completed Application Forms, Transfer Forms and accompanying cheques must be mailed or delivered to:

9.2 Rights attaching to Ordinary Shares

The rights attaching to the Ordinary Shares are:

- (a) set out in the Constitution of the Company; and
- (b) in certain circumstances, regulated by the Corporations Act and the general law.

The Constitution is available on the Company's website (<https://adfc.com.au/milk-supply/>).

Set out below is a broad summary (though not necessarily an exhaustive or definitive statement) of the rights, privileges and restrictions attaching to the Ordinary Shares of the Shareholders.

9.2.1 Voting rights

Ordinary voting shares must only be held by Suppliers.

Subject to any special rights or restrictions for the time being attached to any class or classes of shares, at general meetings of Shareholders, each Ordinary Shareholder entitled to vote may vote in person or proxy, attorney or representative unless a poll is demanded by:

- the Chairman;
- not less than five Shareholders having the right to vote at the meeting; or
- a Shareholder or Shareholders present who are together entitled to not less than 5% of the total voting rights of all the Shareholders having the right to vote on the resolution at the meeting.

Every Ordinary Shareholder present in person or by proxy, attorney or representative will have one vote on a show of hands. On a poll every person present who is an Ordinary Shareholder or a proxy, attorney or representative of an Ordinary Shareholder will have one vote regardless of how many shares they hold. The Share Trustee agrees to abstain from voting in respect of any Shares that it holds.

9.2.2 Dividend rights

Subject to the rights of persons (if any) holding of shares issued with special rights to a dividend, the Directors may declare a final dividend out of the profits of the Company in accordance with the Corporations Act and may authorise the payment or crediting by the Company to the Shareholders of such dividend. All dividends are to be apportioned and paid proportionately to the amounts paid or

credited as paid on the Shares during any portion or portions of the period in respect of which the dividend is paid. Interest may not be paid by the Company in respect of any dividend.

9.2.3 Winding up

If the Company is wound up, the liquidator may divide among the Shareholders in kind the whole or any part of the property of the Company and may for that purpose set such value as the liquidator considers fair on any property to be so divided and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution.

9.2.7 Quorum for Meetings

The Constitution can only be amended by special resolution passed by at least three quarters of Shareholders present and voting at a general meeting.

9.2.9 **Transmission on ceasing to be a Supplier**

Where a person ceases to be a Supplier, the Company will procure the Share Trustee to acquire that Supplier's Ordinary Share for the issue price. In addition, upon a person ceasing to be a Supplier, that person's Redeemable Preference Shares will be redeemed by the Company for the amount paid up on those shares. If a person recommences being a Supplier, then they will need to reinvest to ensure that they comply with the minimum shareholding requirements. Under the Constitution, the Share Trustee will abstain from exercising any of its voting rights in respect of any Ordinary Shares that it holds.

9.2.10 **Minimum share holding**

Subject to the discretion of the Board, members will be required to hold a minimum of 5,000 Shares of \$1.00 each, made up of one Ordinary Share and at least 4,999 Redeemable Preference Shares. Members will have six months to obtain the minimum shareholding. Under the Offer, Ordinary Shareholders will be asked to subscribe for 5,000 Redeemable Preference Shares (one more than the minimum required). 9.2.11 **Maximum shareholding**

The maximum number of shares which may be held by or on behalf of one person is 10% of the issued share capital. In addition, where there are multiple Suppliers supplying milk product from a particular farm or receival depot, no more than four Suppliers from that farm or receival depot may hold Ordinary Shares.

9.2.12 **Directors**

The Board will be constituted by:

- (a) between two and six Regional Directors; and
- (b) subject to Board's absolute discretion, up to three non-supplier directors.

At least two Directors must ordinarily reside in Australia. The maximum number of directors will be nine directors with up to six Regional Directors and three non-Supplier directors. The majority of directors must be Regional Directors. The number of Directors may increase to be more than nine at the discretion of the Board by a $\frac{3}{4}$ majority. The Constitution and the Corporations Act contain provisions relating to the election of Directors.

9.2.13 **Regional Board Representation**

- (a) Region One (Riverina / Northern Victoria) - being that part of Victoria which is not in Region Two and that part of New South Wales as lies to the south of an imaginary line running due north from the New South Wales / Victorian border to Tumbarumba, thence west to Holbrook, thence north-west to Griffith, and then due west to the New South Wales / Victorian border; and
- (b) Region Two (Western Victoria and South East South Australia) - being that part of Victoria which is

west of the City of Melbourne and south of the Western Highway joining the towns of Ballarat, Ararat, Horsham, Nhill and Bordertown and that part of South Australia that is south and east of an imaginary line joining the towns of Bordertown and Kingston.

- (c) Region Three (Eastern Victoria) - being that part of Victoria which is east of the City of Melbourne

9.2.14 Rotation of Directors

From the second annual general meeting of the Company onwards, a third of Directors will be required to retire by rotation. Non-Supplier Directors will be appointed for two year terms. Directors may not serve more than nine years consecutively. Directors who are executives of the Company will not be subject to retirement by rotation (including the restriction on serving as a director for more than nine consecutive years).

9.3 Rights attaching to Redeemable Preference Shares

The Redeemable Preference Shares to be issued under the Offers will be issued on the following terms:

- (a) they carry no voting rights;
- (b) subject to the Redeemable Preference Shares being fully paid up, they can be redeemed at any time in the Board's discretion for \$1.00 each out of profits of the proceeds of a new issue of shares made for the purpose of redemption;
- (c) they do not carry any rights to share in a surplus of assets on a winding up of the Company; and
- (d) they carry a preferential right to receive all dividends to be issued by the Company at any time (for the avoidance of doubt, while there are Redeemable Preference Shares on issue, no dividends will be declared in respect of Ordinary Shares on issue).

ADFC has debtor's insurance cover if in the case a customer fails to pay an invoice for milk supply. 9.10 Taxation

9.10.1 Summary of Taxation Implications

The following comments are intended to provide a general summary of the Australian taxation implications that may arise for certain Australian resident Shareholders in respect of holding their Shares on capital account and disposing of Shares.

The following comments are based on the provisions of the *Income Tax Assessment Act 1936* (Cth) and the *Income Tax Assessment Act 1997* (Cth) and the understanding of the practice of the tax authorities in Australia at the date of this Prospectus.

This summary is of a general nature only and is not intended to be, nor should it be construed to be, legal or tax advice to any particular investor, and no representations are made with respect to the Australian income tax consequences to any particular investor. Accordingly, prospective purchasers of Shares should consult their own tax advisors for advice with respect to their particular circumstances. Investors should also be cognisant that any changes to the legislation or judicial interpretation of the legislation may affect their investment.

9.10.2 Taxation of Future Share Disposals

The disposal of a Share by a Shareholder may constitute a capital gains tax event. A capital gain could arise where the 'capital proceeds' on disposal exceed the 'cost base' of the Share (broadly, the amount paid to acquire the Share plus any costs incurred in relation to the acquisition or disposal of the Shares). In the case of an 'arm's length' sale, the capital proceeds should generally be the cash proceeds received from the sale of the Shares. Any capital gain will generally need to be included as income in your income tax return. Any capital loss can only be offset against capital gains.

9.10.3 Dividends received by Australian Tax Resident Individuals and complying superannuation entities

Dividends constitute assessable income of an Australian tax resident Shareholder. Australian tax resident Shareholders who are individuals or complying superannuation entities should include the dividend in their assessable income in the year the dividend is paid, together with any franking credits attached to the dividend.

Such Shareholders should be entitled to a 'tax offset' equal to the franking credits attached to the dividend subject to being a 'qualified person'. A shareholder is generally considered a 'qualified person' if the shares are held 'at risk' for a continuous period of at least 45 days (90 days for preference shares), or if the small shareholder exemption rule applies.

The tax offset can be applied to reduce the tax payable on the Shareholder's taxable income. Where the tax offset exceeds the tax payable on the Shareholder's taxable income, such Shareholders should be entitled to a tax refund.

In the case of unfranked dividends, only the dividend should be included in the assessable income and no tax offset is available.

9.10.4 Dividends received by Corporate Shareholders

Corporate Shareholders are also required to include both the dividend and associated franking credits in their assessable income. A tax offset should then be allowed up to the amount of the franking credits on the dividend.

Corporate Shareholders are not entitled to a tax refund if the tax offset exceeds the tax payable on their taxable income. However, such excess franking credits may be converted into carry-forward tax losses in some circumstances.

An Australian resident Corporate Shareholder should be entitled to a credit in its own franking account equal to the amount of the franking credits attached to the dividend received.

In the case of unfranked dividends, only the dividend should be included in assessable income and no tax offset is available.

9.10.5 Stamp Duty

There should be no liability for stamp duty in Australia on the issue of Shares by the Company.

9.10.6 Goods and Services Tax (GST)

Under current Australian GST Law, GST should not be applicable to the issue, acquisition or transfer of Shares.

9.11 Litigation

As at the date of this Prospectus, the Company is not involved in any material legal proceedings or arbitration proceedings.

9.12 Authorisation of Prospectus

Each Director has consented to the lodgement of this Prospectus with ASIC and has not withdrawn that consent.

In accordance with section 720 of the Corporations Act, each Director has consented to the lodgement of this Prospectus with ASIC.
